

## Company Overview

### Overview

Server Intellect assists companies of all sizes with their hosting needs by offering fully configured server solutions coupled with proactive server management services. We specialize in providing complete internet-ready server solutions backed by our expert 24/365 proactive support team.

### About Us

Server Intellect, located in downtown Orlando, Florida was born in 2003 from Client Intellect, Inc to assist businesses and individuals world-wide to achieve their internet technology goals. By offering enterprise shared server hosting, virtual private servers and dedicated servers coupled with world class customer service, Server Intellect has become a world recognized leader in the global web hosting market.

### How We Started

Server Intellect was started with the drive to become a leader in the global Internet Technology market focusing on Data and Web Server Solutions. Our main goal was to become a professional, world renowned company offering a great service at a reasonable price. We feel that we have met that goal, and so do our customers.

### Company Overview

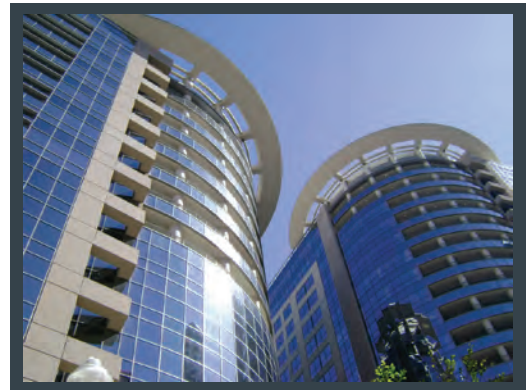

Today, Server Intellect is a privately owned, profitable enterprise that serves thousands of customers from over 90 countries worldwide. By offering cutting edge technologies, industry-leading customer service and comprehensive web hosting solutions Server Intellect has become a frontrunner in the global web hosting market.

### United States Based Employees

Every Server Intellect employee works from our office located in downtown Orlando, Florida. Most Internet Technology companies use outsourced employees located in countries thousands of miles away with little to no care or understanding for the actual company they are working for. You can rest assured that when you reach an employee of Server Intellect, whether it is by phone, email or live chat they are an actual employee working from our offices in the United States.

### Data Center Overview

Most all Server Intellect Servers are stored at the world famous Infomart telecom hotel in downtown Dallas, Texas. A major Internet Hub with backbone connections spanning the world, Dallas is the prime location to house internet based servers needing extremely fast speeds with minimal latency worldwide. Specializing in data center and hosting facilities, Infomart is home to multiple data providers including MCI, Level 3, Equinix, Verio, Switch & Data, Verizon, DataSides and more. The building sits atop three redundant electrical grids from TXU delivering diverse power to each quadrant of the building. HVAC needs are supplied via five one hundred ton onsite water chillers to deliver N+1 cooling requirements. Home to over twelve switch sites and thirty-five different carriers, Informat houses technology and telecom related businesses in a complex communications ecosystem. Access is monitored using Proximity Security Badge Access and Digital Security Video Surveillance. The data center offers complete redundancy in power, HVAC, fire suppression, network connectivity, and security and is the optimal location to serve your applications to the world.

## Trusted and Verified

Server Intellect is proud to be a Better Business Bureau Member of the Central Florida chapter.

## Microsoft Gold Certified Partner

Server Intellect is a Microsoft Gold Certified Partner in the Microsoft Partner Program with a Competency in both Networking Infrastructure Solutions and Advanced Infrastructure Solutions with the Hosting Solutions specialization. This means you can trust in Server Intellect's capabilities with specific Microsoft technologies related to web hosting. The Advanced Infrastructure Solutions Competency is designed for partners with proven expertise in designing and/or implementing complex web hosting and infrastructure solutions. Server Intellect technicians are trained and certified across numerous Microsoft technologies.

## All Technicians are Microsoft Certified Professionals

Every Server Intellect technician possesses a Microsoft Certified Professional (MCP) Certification and has already obtained or is currently pursuing a Microsoft Certified Technology Specialist certification. We have extremely high expectations of all employees at Server Intellect, and believe that each and every one of our employees has the potential to excel at their careers by becoming Microsoft Certified. Every new Server Intellect Technician is required to obtain MCP Certification within 180 days of employment.

## Microsoft SPLA Approved

Server Intellect is a member of the Microsoft Service Provider Licensing Agreement program. This allows us to offer our customers the latest Microsoft software at affordable monthly lease pricing.
